

## » CUSTOM MIXTURES

**Lipomed announces the availability of its new product line of custom mixtures (multi-component mixtures).**

**Custom mixtures offer the following advantages:**

- » No need to open separate ampoules of each compound
- » Calibration time & workload reduced thus saving costs
- » Dilution errors reduced
- » Easy to handle & ready to use
- » Saves storage space
- » Manufactured according to ISO/IEC 17025 and ISO 17034 guidelines

We have developed this line to support the growing need of laboratories looking for custom mixtures that are already calibrated and ready to use.

Additionally to our custom mixtures, LIPOMED also provides a comprehensive range of individual reference standards available as ready-to-use calibrated solutions and powders. Larger standard pack sizes such as 10 mg, 50 mg and 100 mg are also available.
