DEUTERATED ANALOGUES

Stable isotope labeled reference standards are widely used as internal standards for quantitative measurements with mass spectrometry detection.

Indeed, isotopically labeled standards such as Deuterium labeled materials exhibit similar physico-chemical properties to the unlabeled analog and therefore, extraction, derivatization, chromatography and fragmentation are often identical.

Using isotopically labeled materials as internal standards enables laboratories to achieve accurate product determination.

LIPOMED offers a wide range of deuterated analogues and metabolites available as ready-to-use calibrated forms and/or as standard pack sizes of 10 mg, 50 mg and 100 mg.
