

# PAH Priority Analysis

LC | GC

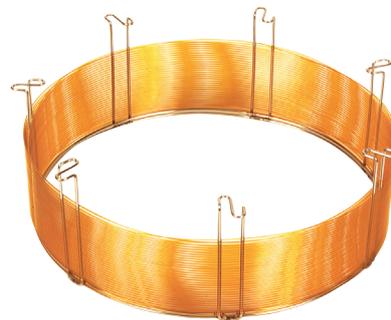

## Kinetex PAH

- Expanded resolution with chemical selectivity specifically for PAHs
- Increased throughput and sensitivity with core-shell technology for HPLC/UHPLC

## Zebron PAH

- Accurately quantitate EU and EPA PAHs in less than 28 minutes
- Excellent separation for critical PAH isomers

# FASTER, BETTER RESULTS

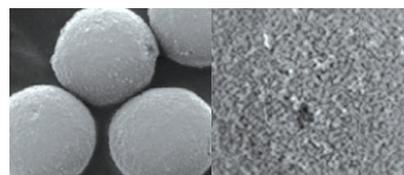

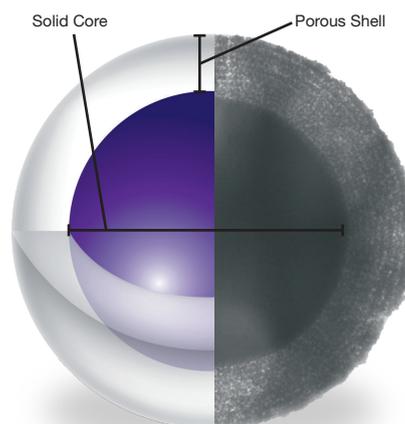

## Kinetex Core-Shell Technology

### The Chosen Core-Shell Brand

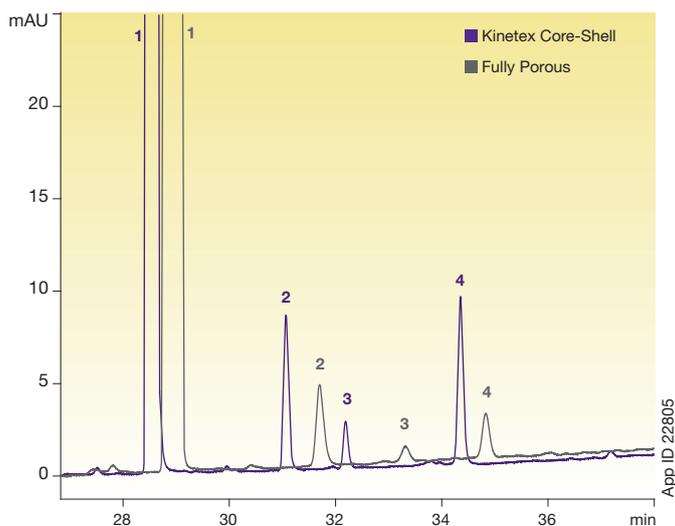

Kinetex® Core-Shell Technology delivers dramatic improvements in efficiency over conventional fully porous media which can be leveraged to increase resolution, greatly improve productivity, reduce solvent consumption, and decrease costs. Whether you are running HPLC or UHPLC methods, the Kinetex core-shell family can deliver shockingly improved performance over the current column you are using.

### Finely Tuned, Unique Core-Shell Manufacturing Process

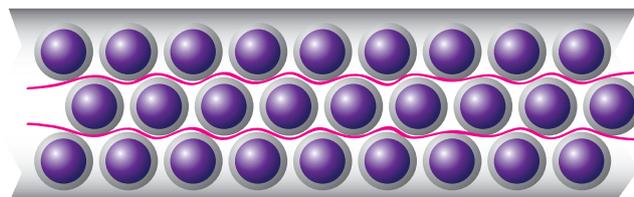

Phenomenex designs, manufactures, and sells its very own silica and organo-silica core-shell particles. Using silica sol-gel processing techniques that incorporate nano-structuring technology, a durable, homogeneous porous shell is grown on a solid silica core to create a core-shell particle. The combination of a consistent, solid high density core along with proprietary column packing technologies ensures optimum bed structure and high column performance.

### Typical Core-Shell Performance Gains!

You can unleash the power of Kinetex Core-Shell Technology columns to achieve faster and better results just not possible on conventional fully porous materials. No matter what type of system you have or type of analysis you are performing, there is a Kinetex solution for you.

## Zebron™ Gas Chromatography Technology

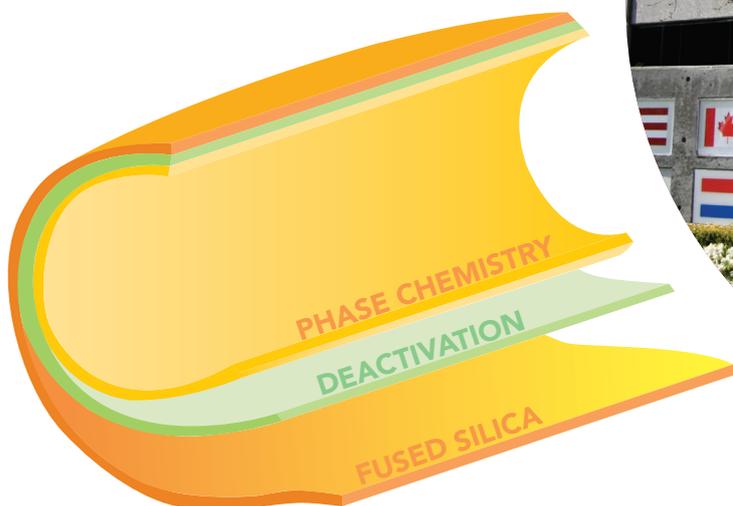

### Continued Innovation with GC Expertise

Our inventive GC scientists have 25+ years of experience, and many helped create keystone phases at J&W Scientific before joining the Phenomenex team. Zebron's track record of innovation is the only to be recognized with 3 R&D 100 Awards and 2 Readers' Choice awards! This tradition of GC innovation continues even into 2017 with the release of the ZB-23, ZB-88, ZB-FAME and ZB-PAH.

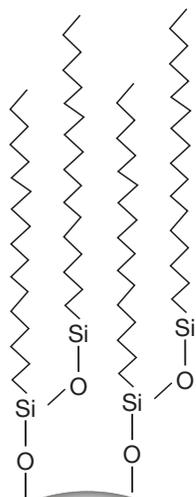

### More Than Just A Column

When you choose Zebron, you get more than just high quality GC products. Choosing Zebron means you get access to a wide variety of tools, resources, and personalized support to help make your GC work easier, faster, and simply better.

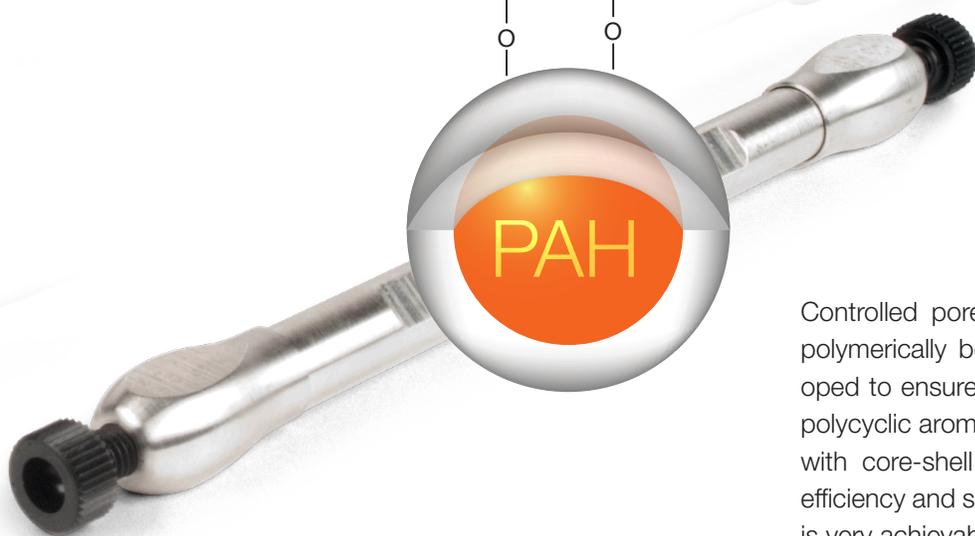

# Designed for **PAH Analysis** by HPLC/UHPLC

“**Innovative Polymerically Bonded C18 Core-Shell PAH Column!**”

Polycyclic aromatic hydrocarbons (PAHs) are a hazardous set of compounds that come from a variety of materials and processes. With the need to accurately identify toxic forms of these compounds quickly in the environmental, fuel, food industries, we specifically developed the first core-shell based LC product for PAH analysis. Now high resolution PAH separations can be attained under fast run times on both HPLC or UHPLC instrumentation.

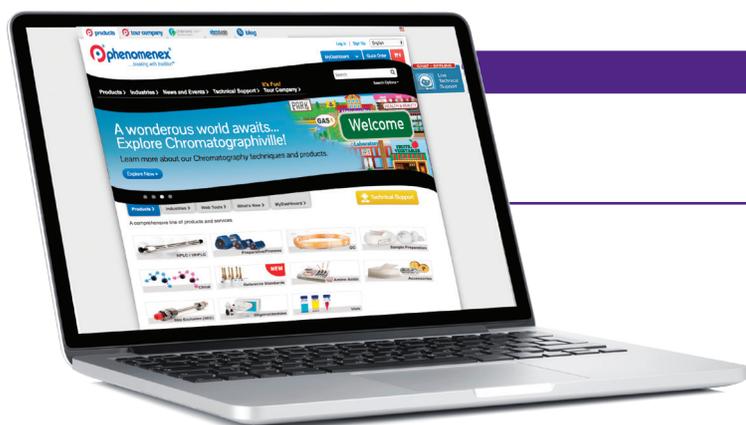

Controlled pore size processing and a proprietary polymerically bonded stationary phase were developed to ensure excellent resolution between priority polycyclic aromatic hydrocarbons (PAHs). Combined with core-shell particle technology, incredibly high efficiency and sensitivity at comfortable LC pressures is very achievable.

- **QC tested for PAHs (EPA 610)**
- **Enhanced resolution and performance for PAH analysis**

## **Have either an HPLC or UHPLC?**

No worries! The Kinetex® PAH 3.5µm core-shell particle size and format has been chosen to provide optimal performance on both HPLC and UHPLC instrumentation.

# Designed for **PAH Analysis** by GC

**Very low bleed proprietary stationary phase is applied to the deactivated surface**

Zebron™ ZB-PAH columns are manufactured and tested to provide the most optimal performance for EU-regulated polycyclic aromatic hydrocarbons (PAHs). The columns are individually tested with an application-specific QC test probe mixture and deliver excellent resolution of critical PAH isomers, such as benzo[b,j,k]fluoranthene.

With exceptional thermal stability and low column bleed at elevated temperatures, ZB-PAH columns bring the added benefit of good column lifetime alongside a consistent column inertness that promotes accurate baseline resolution for critical isomer pairs.

## Fit for Purpose Testing

ZB-PAH columns are verified with tight industry QC specifications for column bleed, sensitivity, and performance to provide you utmost confidence in qualitative and quantitative results for the analysis of PAHs.

- **QC tested for PAHs**
- **Exceptional thermal stability and low column bleed**
